

EPM-Basefiles

Basefiles allow advanced users to change any of the hard coded phone options that EPM has set as defaults for options that are not exposed in the template for each brand. You can also use any of the [variables that are exposed here](#). Click on the link below based on what version of EPM you are using.

For versions 2.10.X and 2.11.X [click here](#).

For versions 12 or greater [click here](#).
