

# RESTful Interface

- [REST Documentation](#)
- [Python Library](#)
- [PHP Sample Code](#)

Sangoma's SBC can be fully configured using a RESTful API. Programmatically provision, configure and operate.

## REST Documentation

The API documentation is auto-generated and it can be found here:

- <http://nsc-rest.docs.sangoma.com> (Outdated)

## Python Library

- <https://github.com/sangoma/safepy2>

## PHP Sample Code

Examples of the API usage in PHP can be downloaded here.

- <https://github.com/sangoma/sbc-rest-php-examples>
