

Phone Apps-SPM

This module provides some features around the room status. Also:

- You can send a text message from a predefined list to the receptionist.
- Send the secret codes to your email address.
- You can change the status of your room (Clean, Not Clean).
- Show details of the mini-bar.
- See, set, delete your alarm clock.
- See how many calls have been made.

To add Phone Apps-SPM through End Point Manager, select **Rest-SPM** module into the list of apps of the template phone and change **SPM** label to **My Room**, or whatever you want.
