

Phone Apps-Do Not Disturb

The Do Not Disturb (DND) Application allows you to toggle your current state of DND between enabled and disabled. On phones that support the BLF light, the light next to the DND button on your phone will light up when this application is enabled. Also, phones that support a center notification bar will display an alert any time you have DND enabled.

Click one of the following manufacturers to view the user guide for this application:
