2.3.27-126-GA	nsc-2.3.27-126-GA-unattended.iso	Unattended NSC VM Installation ISO Image	Release Notes	January 30 2020

For minor/major version upgrades, begin by upgrading to the latest minor patch version, before upgrading the minor/major version.

In example, to upgrade from 2.2.1-18-GA to latest, one would first need to upgrade to 2.2.14-57-GA and only then upgrade to 2.3.23-119-GA

Use of special characters for the system/root password in the installer application is not supported.
