

Phone Apps-Parking

The Parking Application lets you see all the parked calls that you have permissions for. It is designed to work with both the [Parking Module](#) and the [Park Pro](#) module. You can visually see your parked calls, pick up any parked call, and park calls with the same application (depending on phone support). If using [Park Pro](#), the Parking Application will only let the user see public parking lots unless the user is a member of a private lot. The application will always park a caller in the user's default parking lot as set up in your PBX.
